Stunning for decades

Pura® NFC can stand out as an architectural element or harmonize with landscapes and other building materials. Its closed surface minimizes dirt build-up and makes the siding easy to clean. It keeps buildings looking good for decades.

High impact and scratch resistance

PURA® NFC BY TRESPA

All-season durability

The façade protects what's behind it. But what protects the façade? Pura® NFC uses next-generation Electron Beam Curing (EBC) technology to create a closed and smooth surface. The system is built for rough weather and has high impact and scratch resistance. The built-in color stability means Pura® NFC will look good for years without any replacement.

No painting or refinishing needed

Hassle-free maintenance

Pura® NFC by Trespa isn't just beautiful; its durability means you do not have to worry about it. The closed surface prevents dirt from building up, making cleaning easy and infrequent. Contaminants like soot, salt, graffiti and permanent markers are easy to remove. Buildings keep their vibrant beauty year after year. It's yet another way that buildings with Pura® NFC façades give owners less to worry about and more time to enjoy their home with friends and family. Pura® NFC is an investment in lasting curb appeal.

The closed surface created by Trespa's proprietary Electron Beam Curing (EBC) technology makes it hard for dirt to build up, locking it out and colors in.

PURA® NFC BY TRESPA

Siding is intended to be outdoors, after all

Whether it's salty sea air, wind, rain, humidity or intense sunlight, Pura® NFC stands up to the weather. Each Pura® NFC sample undergoes many laboratory tests where it's exposed to damaging climate elements, then checked to confirm that it has maintained its vibrancy and polish. Imagine the beauty of a seaside home that remains richly hued without the need for constant repair. The Pura® NFC system is manufactured for long-lasting performance and beauty – an investment in the future.

FOLLOW MY ADVENTURES!

#FOLLOWTHEHUB

Recently, our backyards have become our sanctuaries, our party rooms and our playrooms. Vacation homes, on the other hand, have always been an escape to calm, whether surrounded solely by nature or a park with amenities and activities. Whatever use the buildings are put to, a façade built with Pura® NFC will enhance the beauty of a property.

Pura® NFC is an enduringly beautiful siding with engineered durability and a range of luxurious decors, from textured Siberian Larch to the dark velvety texture of Pura® NFC Lumen.

The beauty of Pura® NFC siding is that you can install it and be done. It stays pristine for decades, so maintenance is hassle-free. Make your vacation home or garden house a source of joy - not chores - for everyone!

PURA® NFC

A complete solution

Pura® NFC comes with a tailored collection of installation clips, color-matched profiles and fasteners - everything needed to create an evenly hued façade. Every detail can look exactly as it was designed. The siding comes prefinished, but if they need to be fitted for a dormer or eaves, the strength of Pura® NFC means installers can saw without splinters or shattering. Also, the edges don't need sealing - the durability and hue go all the way through. Corners stay sharp and flats stay smooth.

Easily
installed,
and be done

PURAR[®] NFC BY NESPA

No-fuss installation

Pura® NFC is engineered to be used in a ventilated façade solution that's easily installed. The relatively low weight of the prefinished siding makes it easy to slide into place and its durability means it can handle a rough build site. The combination of durability and ventilation helps Pura® NFC withstand challenging climates.

1. Pura® NFC siding
2. Pura® NFC clip
3. Color-matched profile
4. EPDM
5. Subframe
6. Color-matched fasteners
7. Load-bearing wall
8. Ventilation airflow

The system includes an air cavity in front of the load-bearing wall, allowing an airflow that prevents heat or moisture accumulation.
