UNLOCKING A LEGACY

Legacy. That is the significance unlocked by every one of our wrought iron doors, railings, and windows.

It represents the strength that defines our past. The achievements that built our present, and the aspirations that inspire our future. Honoring how our iron doors are forged in a furnace, making them stronger and more resilient, we too are shaped by a spirit of innovation and excellence.

Aspiring to unlock a legacy for homeowners that will last forever.

YOU HAVE THE POWER

Love That Door has been advancing the frontier of custom wrought iron doors, railings, and windows for over a decade.

We have overcome industry-accepted limitations by creating timeless iron elegance.

Today, our story means so much more. We've inspired a future where each custom iron door is as distinct as your life and home.

Shape, patterns, symmetry, colors, textures, flow, and framing - the possibilities are limitless, and you have the power to decide.

TRUST AND RESPECT

We have earned the trust and respect of our customers, employees, and extended family through transparency, security, durability, and privacy. We also aim to deliver the industry's most trusted product warranty.

• UNLOCK YOUR LEGACY •

DOORS THAT LAST A LIFETIME

We build our doors, railings, and windows with a wealth of experience and expertise.

Reflecting more than a decade of innovation and refinement, they're precision-engineered, handcrafted, and built to last.

UNRIVALED QUALITY

Each handrail we create is handwrought by our expert artisans to fit your exact specifications and taste. Our team specializes in handwrought scrollwork, meaning we accommodate any technical specifications for any shape and dimensions.

Many of our competitors claim their products are iron, and many claim their products are hand-forged, however few reach the status of doing this for every handrail they create. At Love That Door each railing meets our exacting standards. Its awe-inspiring design is bolstered by scrupulous attention to detail, evolving into a commanding element that demands to be noticed.

BRING THE OUTDOORS IN — KEEP WEATHER OUT

Unrivalled build quality and unyielding protection from the elements means you can enjoy your space in any season.

With limitless panel configuration options you can design and create the perfect view inside and out.

AN EXPRESSION OF LEGACY

We've upended the status quo by designing, building, and installing iron doors with scarcely believable toughness, making us a premier wrought iron entryway and home design company. That means we settle for nothing less than the best materials and craftsmanship.

Each design we create celebrates a legacy, inspiring self-expression, creativity, and mastery. Every product on our showroom floor enables our clients to commission a work of art that unlocks a legacy that is as unique and as special as they are.

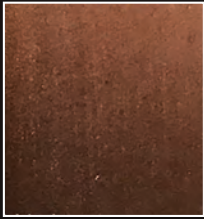

DETAILS AS UNIQUE AS YOUR HOME

Love That Door has a selection of glass and metal finishes to choose from for all of the iron products we sell. You can pick and choose a variation of options that works best for your home or setting.

If you have any questions about the look and feel of a specific combination, please give us a call as we may be able to find an example of a similar iron door construction previously sold.

Iron Threshold Welded to the Unit

**MODERN
AESTHETIC.
ADVANCED
ENGINEERING.
THE PIVOT DOOR.**

For those with an uncompromising vision of a larger-than-life door. Our pivot doors boast sophisticated engineering and a sleek modern aesthetic, as well as full-steel frame construction. Sleek design and timeless craftsmanship opens new possibilities for greater door sizes that other companies deem unachievable. Innovative hinge placements add a balancing counterweight to the opening side of the door. Even the largest pivot doors feel airy and weightless.

AN ELEGANT AND RICH ENTRANCE

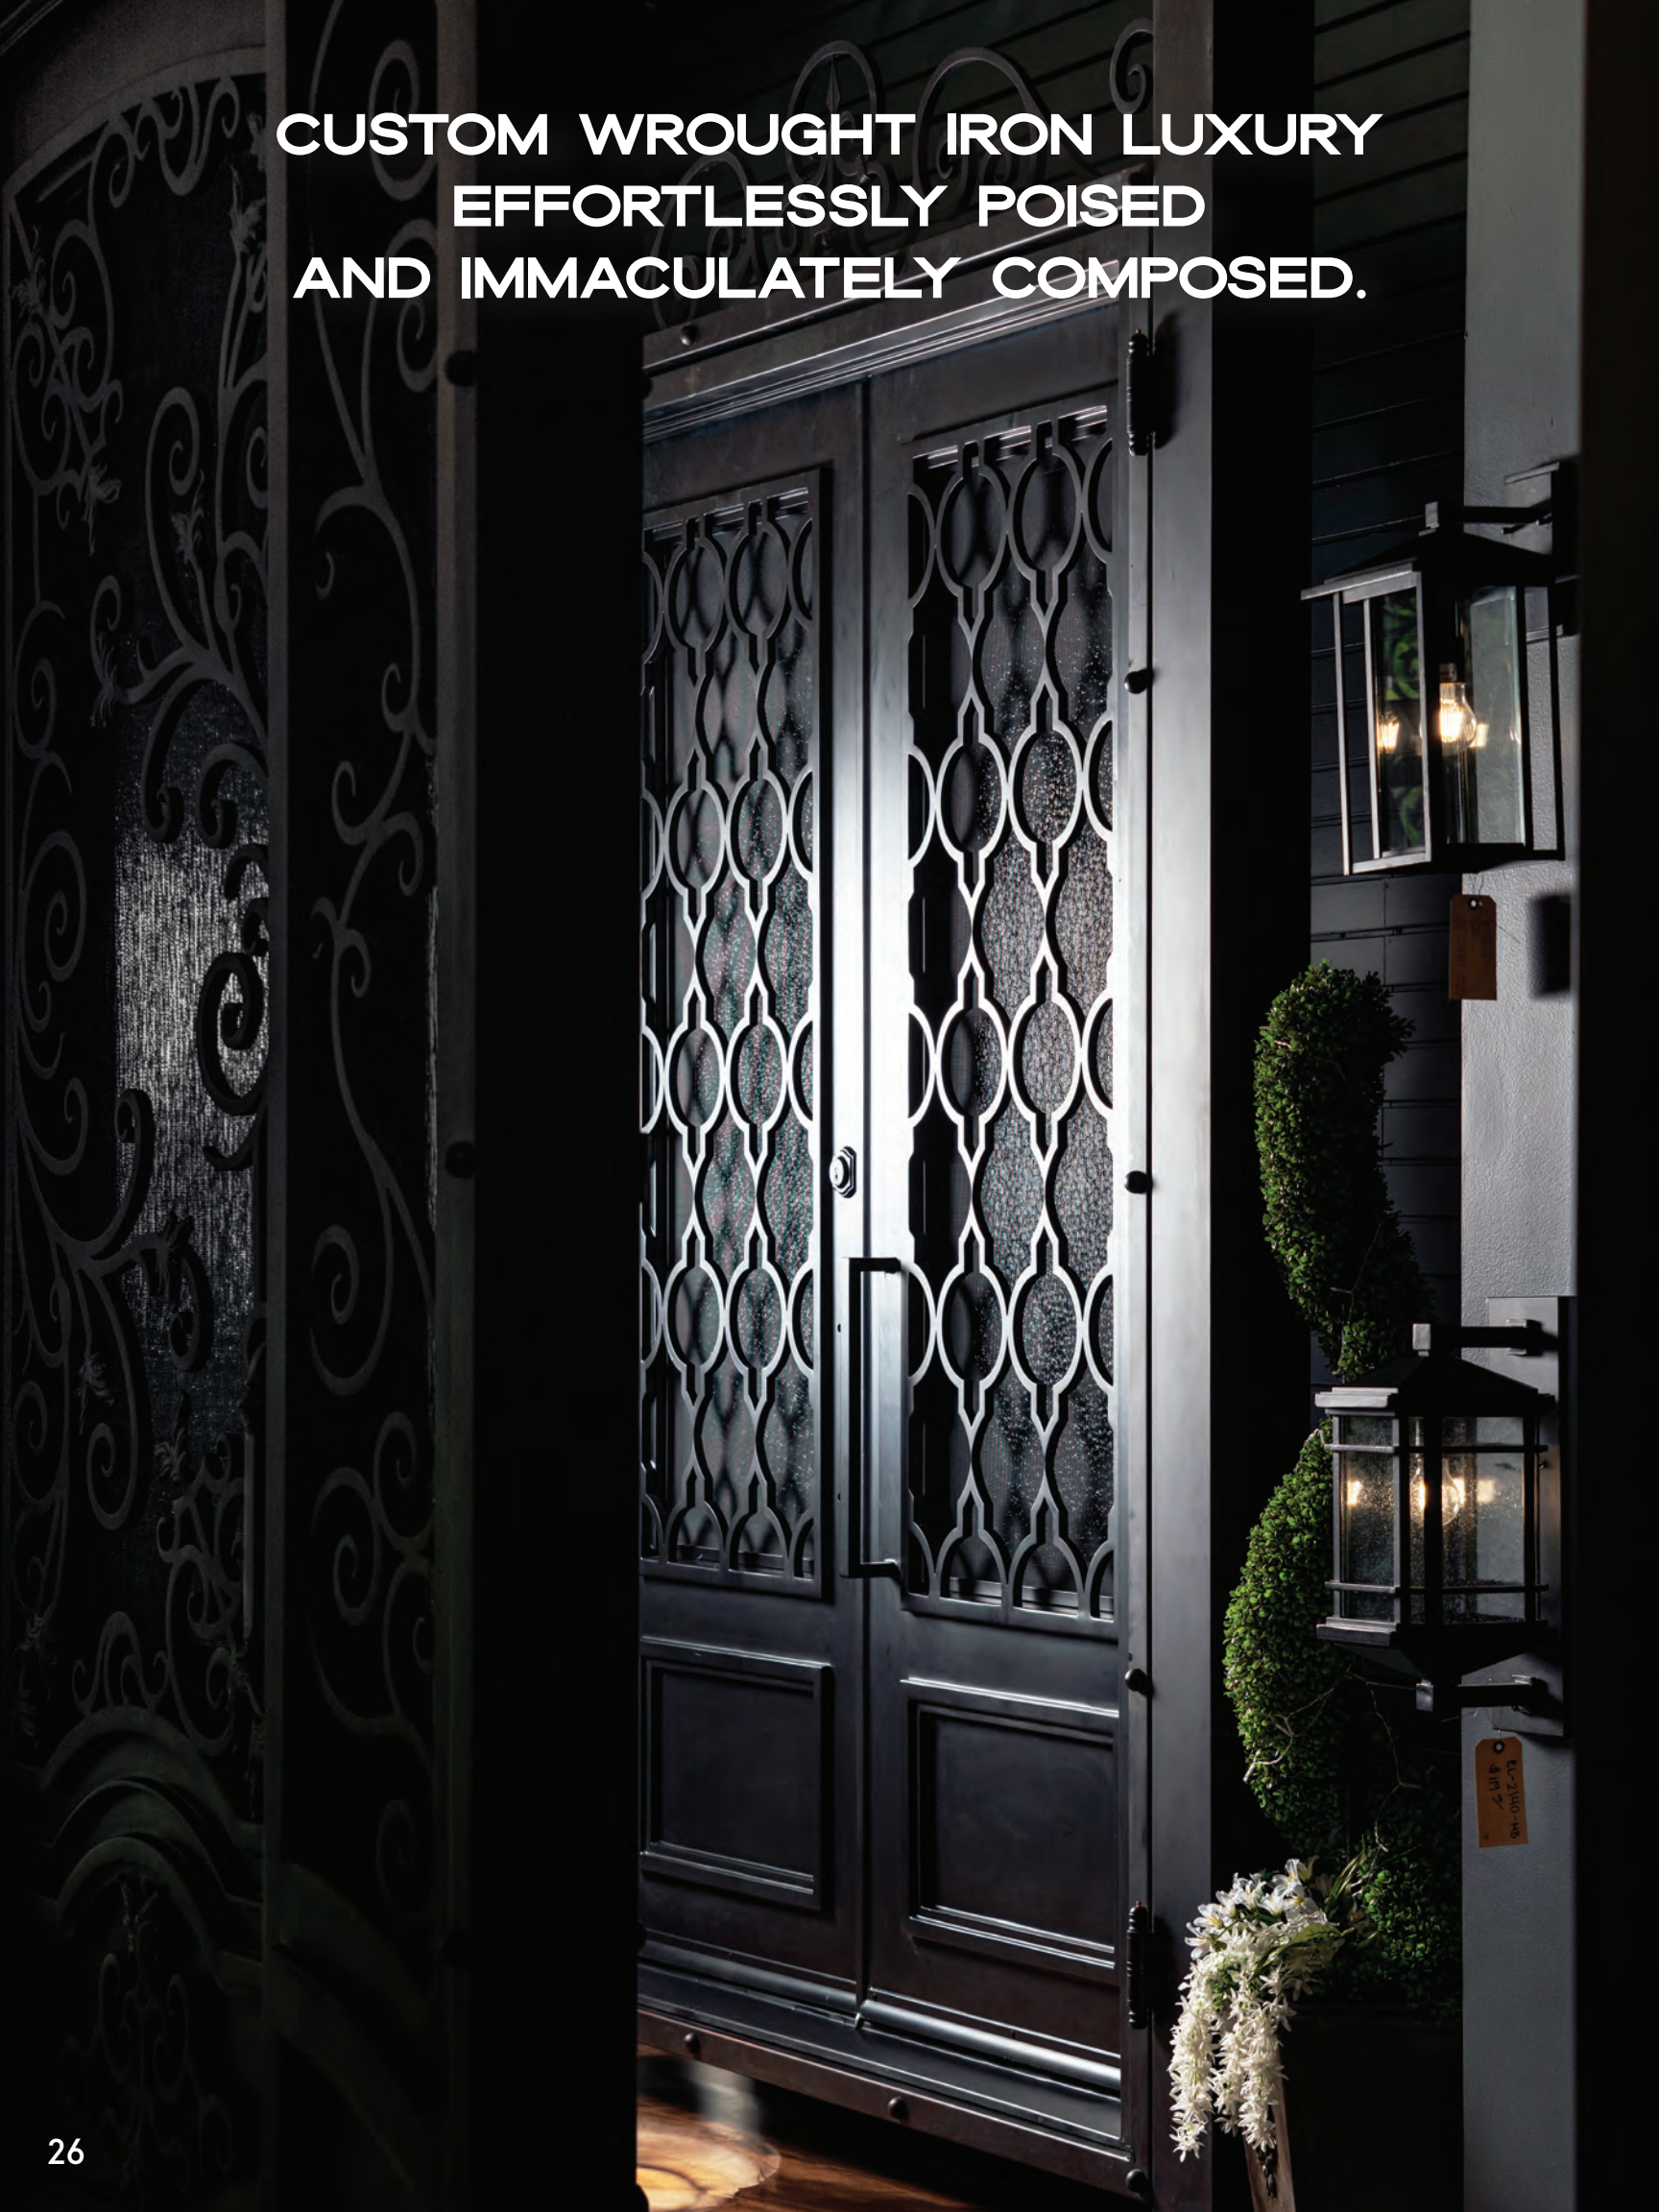

The single entry iron door creates a powerful focal point for its owner's home. The ornamental wrought iron represents a rich and elegant spirit that will last a lifetime

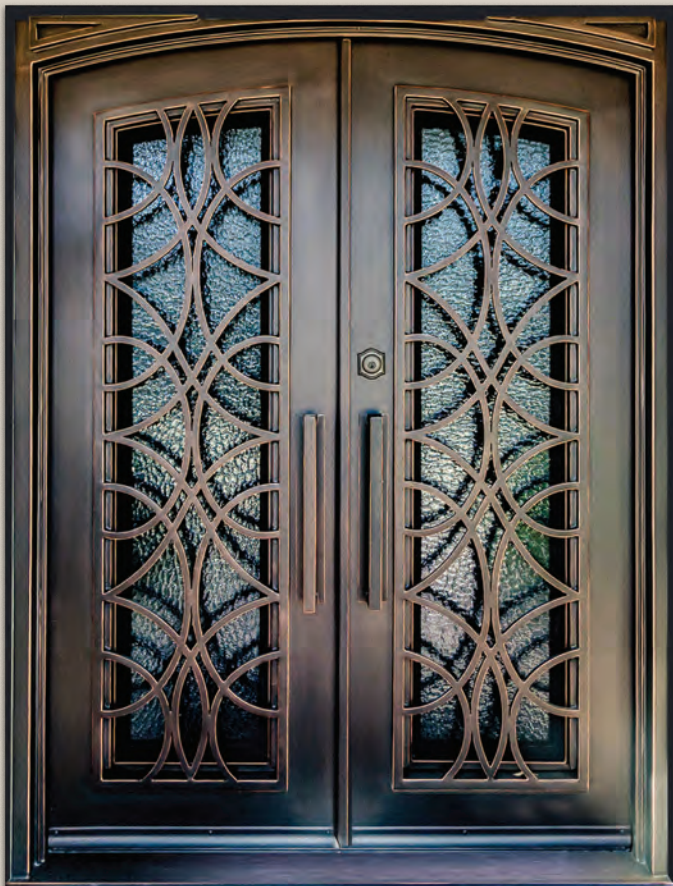

**CUSTOM WROUGHT IRON LUXURY
EFFORTLESSLY POISED
AND IMMACULATELY COMPOSED.**

THE DOUBLE ENTRY IRON DOOR

Every wrought iron door from Love That Door is built using only the world's strongest and longest-lasting steel. Our intensive selection and refinement process ensures only the most robust wrought iron is smelted into this iconic entryway.

DOORS WITH TRANSOM.

Transoms can be added to any of our iron doors with custom-designed scrollwork to make each one uniquely yours, and a tastefully artistic addition to your already striking iron door.

FENCES AND GATES.

A custom wrought iron gate or fence is a security feature that can double as a beautiful piece of art.

We love seeing the faces of our customers when we install their product.

Our wrought iron gates and fences are created specific to the unique dimensions of your home,
making each piece a perfect fit!

Our wrought iron designs create a focal point in your home, business, or outdoor setting. Whether it be a gate, balcony, fence, or a door, handrail, or a heavy duty gate for your driveway, we aim to meet your needs. Possibilities are endless when you customize your iron products with us!

AN UNRIVALED LEVEL OF SOPHISTICATION, ARTISTRY AND CRAFTSMANSHIP

If it says "hand-forged", make sure it is.

Hand-forged wrought iron should use solid steel that is fired and then hand bent into shape. Beware of mass-produced or machine cut doors that typically use hollow material that looks the same, but lack the quality.

**BOLDLY DISPLAY
YOUR STYLE AND PROMINENCE**

YOUR NEW DOOR GUARANTEE

We guarantee to build your door using the highest quality steel throughout the entire process. All of our doors are fabricated with a 10-gauge steel jamb and 12-gauge steel doors. All doors will have an optional operating glass panel and optional magnetically attached removable screen(s) to be able to enjoy ventilation while still maintaining security.

All doors have been dipped in a hot zinc process, then sprayed with an acrylic primer which is then baked on. The doors are then sprayed twice with the selected color and clear coated for protection, thus preventing any rusting or oxidizing. All doors and frames are filled with closed cell, high density polyurethane foam, for the highest quality insulation. All doors include our 10-year limited warranty for the factory finish from the date of installation.

We also offer a one-year warranty on any seal breakage of tempered glass. For all other components, we offer a one-year warranty—covering weather stripping, door sweep, window latches and flush bolts.

For a more detailed description or for any additional questions, please feel free to contact our office or your sales representative. We thank you, and are pleased that you have considered Love That Door for your home needs. If You dream it, we can BUILD IT!
