15L/4 GAL covers 1000 – 1300 Sq/Ft

.....

BIODOMUS™ II

Interior & Exterior Mineral Paint with additional aggregate ideal for absorbent, unpainted masonry to create a textured, stucco-like finish.

1L/1QT covers 55 – 75 Sq/Ft
2.5L/.67 GAL covers 135 – 185 Sq/Ft
15L/4 GAL covers 800 – 1100 Sq/Ft

Mineral Paints Made For Masonry Without Damaging The Surface Or Integrity Of The Structure

"We don't get the complaints when we use Romabio paint products as our customers are very happy with the transformation of their house, and we've never, not made a customer happy with these products." – Daniel Murrey, Service Painting in Dallas, TX

"When we painted a 27 unit multi-family brick building, I did a side-by-side comparison of the BioDomus I product and one of your competitors and found that it had much better coverage. The BioDomus I product adhered to the surface better too, and wouldn't scratch or chip off. We are really pleased with it and with only two coats needed, it has better value and performance." – Randy Parks, Special Projects for Wesley Apartment Homes and Euramex Management Group

Create the home you want with Romabio, Italian made masonry paints.

Different than other paints.

Romabio Masonry Paints are BIO (bio-logical), made from nature. They are not acrylic or latex paints. They are mineral based paints that are derived from sustainable materials to create a natural, breathable coating. BioDomus™ I and BioDomus™ II are both high-performing paints that are inherently the same. The only difference is BioDomus I is an extremely flat finish giving you a traditional painted masonry look, and BioDomus II has slight aggregate in it to create a textured look on smooth brick or a smooth finish on a rough surface.

A 20 year warranty you can trust.

BioDomus I and II are Italian designed mineral paint technologies that have been proven over time. These paints have high perm ratings of 70+ allowing trapped water vapor to diffuse or escape from the masonry surfaces, unlike acrylic paints. We guarantee they will last 20 years with no peeling or chipping when applied properly.

It's breathable and naturally mold-resistant.

Romabio Masonry Paints are made from natural ingredients that when dry, form a honeycomb structure that contributes to a breathable wall system. A breathable wall means these paints will NOT seal the surface, but moisture and air can move through it reducing the buildup of stagnant moisture that contributes to mold growth, toxic air, and other issues. Acrylic coatings are not breathable and trap moisture.

Natural beauty and luminous colors.

BioDomus I and II are naturally beautiful because of the high mineral content. Different than a shiny acrylic finish, the flat finish on brick or stone becomes like a rock like the masonry surface. Color possibilities are almost unlimited as you can match other color palettes or choose from over 200 colors in the Romabio color deck. And, with an extremely high-UV resistance, it extends the performance of the product.

Good for you and the environment.

Toxin-free, made with natural ingredients, and backed by 3rd party scientific testing, you can trust our paint is safe for you, your family, and the environment.
