

Connect

Connect reflects the contemporary nature of the present, where everything interacts, is mixed, multiracial. Combining different stones, a unique and original surface is created, where diversity becomes the new beauty, to be discovered through a slightly "lived-in" texture in which delicate colors, a variety of designs and natural veining intermingle. A perfect mix that generates an extraordinary new look, suitable for any type of indoor environment. Connect, is a one of kind porcelain tile that is made with Microban antimicrobial technology.
