

PURA[®] NFC

BY TRESPA

The matte surface of Lumen gently disperses light, creating a soft illumination in a saturated hue.

Durability meets beauty

Hassle-free maintenance

Install once, and be done

A complete solution

Pura[®] NFC comes with a tailored collection of installation clips, color-matched profiles and fasteners - everything needed to create an evenly hued façade. Every detail can look exactly as it was designed. The siding comes prefinished, but if they need to be fitted for a dormer or eaves, the strength of Pura[®] NFC means installers can saw without splinters or shattering. Also, the edges don't need sealing – the durability and hue go all the way through. Corners stay sharp, and flats stay smooth.
