Since 1989, we have proudly provided exceptional products combined with unmatched customer service from our 8 solution centers and dedicated network of over 400 dealers.

A Name Built on reliability for 30 years.

Extracted from Iceland’s Mt. Hekla volcano, Isokern brand products have been made from the cleanest, purest pumice for over 80 years. Our masonry components cradle the raw power of fire in the safest, most energy-efficient material on earth. Totally customizable, Isokern allows architects and their clients to pursue their most inspired designs, while connecting with the natural beauty of fire.

We Make Fire Better.

Did You know?

Our pumice ships directly from the Mount Hekla Volcano in Iceland to our state-of-the-art automated manufacturing facility in Chesapeake, Virginia.

Talent is a Flame, Genius is a Fire.

~ Bernard Williams

Insight into Our Technology

Our modular components cradle the raw power of fire in the safest, most energy-efficient material on earth. Due to the material’s properties, the components are lightweight, while retaining UL 127 for Modular Masonry Fireplaces and UL 103HT for our Dual Modular Chimney System (respectively) listings. Isokern allows architects and their clients to pursue their most inspired designs, while connecting with the natural beauty of fire in a way that, until now, only nature could.

Our in-house designers and engineers work hand in hand with specification professionals for residential, commercial and institutional projects across North American.
As the first Isokern modular fireplace introduced in the United States, the modular construction of the Standard Series allows you to unleash your creative desires with a fireplace as unique as you are. Whether you choose wood burning, natural gas or liquid propane, the Standard Series sets the standard. In an outdoor application, this fireplace can be finished with any veneer including brick, stone, stucco, or tile.

Make your ideal dream home a dream come true with Isokern’s Standard Series.

As the first Isokern modular fireplace introduced in the United States, the modular construction of the Standard Series allows you to unleash your creative desires with a fireplace as unique as you are. Whether you choose wood burning, natural gas or liquid propane, the Standard Series sets the standard. In an outdoor application, this fireplace can be finished with any veneer including brick, stone, stucco, or tile.

Please Note: When using the Isokern brick ledge it is required that the firebox/smoke dome assembly include the placement of a 4” by 4” by 3/8” minimum steel angle across the firebox opening. This item can be sourced locally.

Fan the flames of innovation and take your fireplace to new heights with Isokern’s Magnum Series.

The Magnum Series Fireplace offers wood or gas burning solutions with the largest openings available in the market, models include 36, 42, 48, 60 & 72. Utilizing Isokern’s proprietary straight-back interior design coupled with an innovative contoured shelf, the modular Magnum Series provides unequaled efficiency, performance and custom fireplace design flexibility.

The Magnum 60 & 72 has a double flue to allow for proper drafting with the larger firebox size.

Assembled Firebox and Smoke Dome Dimensions for 28, 36, 42, 48, 60 & 72
Specifications - 28, 36, 42, 48

Please Note: When using the Isokern brick ledge, it is required that the firebox/smoke dome assembly include the placement of a 4" x 4" x 3/8" minimum steel angle across the firebox opening. This item can be sourced locally.

When you’re designing a space that’s larger than life, you need a fireplace to match it! NEW from Isokern is our ground-breaking Magnum Fireplace.

Boasting widths up to 10 feet and finished opening heights of 44”, this stately fireplace is the largest UL listed fireplace on the market. Earthcore is always looking to expand the boundaries of fire, and with the Magnum fire has no boundaries.

* Angle iron support not pictured but required.

Solid Fuel or Gas
The largest UL listed wood burning fireplace on the market.

Open Sizes Customized to Your Project
Opening widths of up to 10 feet.
Specifications - 84, 96, 108, 120

Please Note: It is required that the firebox/smoke dome assembly include the placement of a 6” x 6” x 3/4” minimum steel angle across the firebox opening. This item can be sourced locally. Eco-Steel or Eco-Steel+ is the required flue system for this fireplace. The 84 Magnum+ requires 3 flue outlets. Models 96-120 require 4 flue outlets.*

Put the awe-inspiring power of fire on full display with Isokern’s Maximus Series.

The Isokern MAXIMUS Series is the first ever masonry direct vent fireplace. Offering an expansive ceramic glass opening with Invisi-Barrier and Triple Stadium Burner for exceptional appearance and flame presentation. With an array of options, the MAXIMUS provides endless possibilities for making your space warm and inviting.
As the first and only field assembled gas appliance fireplace, the Isokern Bvetto Series offers the largest available opening heights in the industry of 52". With our proprietary quick fire ignition system, the Isokern Bvetto comes complete with our exclusive Isoflames Stadium Burner and Remote Electronic Ignition.

Opening heights sure to make a true statement in any living space with Isokern’s Bvetto Series.

Please Note: Different height options are available for the Bvetto fireplace. One additional backwall and two additional sidewalls can be added to obtain an opening of 42" tall before brick is installed. Two additional backwalls and four additional sidewalls can be added to obtain an opening of 52½" tall before brick is installed. Only Isoflames log sets can be used in this unit.

Assembled Firebox and Smoke Dome Dimensions for 36, 42 & 46
IsoKern Chimney Systems have vented over 155 million meters of chimney in North America.

The DM54 Chimney System is zero clearance system made with our Icelandic Pumice that is a natural insulator. This unique property is what separates our pumice from all other chimney materials. The insulating properties of Pumice allow the flue gases in the chimney to quickly reach their optimum temperature, enabling the heating appliance to perform efficiently. It also keeps the chimney warmer longer as the heat output of the fireplace decreases. This not only aids performance, but reduces the likelihood of condensation and soot build-up.

Our Component based system is made up of inner and outer blocks that are laid with staggering joints for safety and stability. The double layer of pumice blocks, separated by an air gap, maximizes the chimney insulation. This system is the only masonry chimney system tested and listed to UL ‘103HT (2100° High Temperature) standards.

Specifications

Please Note: The DM54 Chimney system is zero clearance to combustible materials. Offset Blocks offer the ability to move a vertical chimney from side to side, allowing it to pass objects above the firebox. Offset blocks require 1 1/2” clearance to combustible material. “Combustibles” are defined as “normal construction materials” and are considered to be: wood framing materials, particle board, mill board, plywood sub-flooring, plywood paneling and wood flooring.

Isokern Chimney Systems have vented over 155 million meters of chimney in North America.

Our 16” Diameter EM 40 Universal Flue is the largest insulating masonry chimney available. With proprietary “Air-Vent” technology, it will not crack like cheaper concrete alternatives. Used exclusively for outdoor applications. It requires a 2” clearance to combustible materials.

**Fireplace & Chimney Accessories**

**EM 40 Mono Flue Cap**
Specifically designed for the Isokern 16” EM-40 Mono Flue, this Stainless Cap is easily installed. This cap slides on top of the EM-40 Mono Flue.

**Cast Iron Damper**
This Cast Iron damper is designed to sit in the throat of the Isokern fireplace and can be opened and closed with the poker control. Sizes Available: 33”, 42”, 60” & 72”

**Sealed Cast Iron Damper**
Our New Sealed Cast Iron dampers substantially prevent air from escaping the chimney while also preventing outside air from entering the home. This damper utilizes a high temperature fiberglass gasket to form a tight seal, offering energy efficiency for masonry fireplaces without the use of glass doors or chimney top dampers. Sizes Available: 33” & 42”

**Bottom Mount Damper**
The Bottom Mount Damper is a proprietary design to be used when a conventional poker or top-mount damper is not feasible. Great with see-through applications, this type of damper can be paired with either the DM54 or Steel Chimney Systems.

**Cast Iron Grates**
Stop struggling with fireplace grates that don’t hold logs in the right location in your fireplace and have poor ventilation. With these Cast Iron Fireplace Grates in your fireplace, those concerns will be a thing of the past!

- XB SIZES AVAILABLE: 24”, 30”, 36”
- HL SIZES AVAILABLE: 23”, 27”

**Earthcore Isokern Adhesive**
The Earthcore Adhesive, is a thin-set masonry adhesive, which can be used in either interior or exterior installation. Properly mortared fireboxes and smoke dome assemblies require approximately five gallons (dry measure) of Earthcore Adhesive. 1 pail per 12’ of DM54.

**Outside Air Kit**
Our Outside Air Kits are available with 4” diameters. These kits help prevent back draft smoking caused by negative pressure in the home.

**Outside Air Kit Stainless Steel Door**
Part #OA4KS

**Outside Air Kit Matte Black Steel Door**
Part #OA4KB
Fireplace Enhancements
**STANDARD FIREBRICK SIZES:**

- **Fulls:** 9” x 4 1/2” x 2 1/2”
- **Splits:** 9” x 4 1/2” x 1 1/4”
- **Soaps:** 9” x 2” x 1 1/4”

*Red & Cream Firebrick ONLY

Make your fireplace a part of your home’s decor with Isokern’s Firebrick options.

Typically made of fire clay or siliceous material, our Firebrick is a refractory brick, capable of sustaining intense heat without fusion. And since it’s not prone to expansion or contraction, this material helps minimize cracking under extreme heating conditions. Coloration and size varies slightly.

#### Available Colors:

All available in Fulls & Splits. Red & Cream Firebrick is available in Soaps. Soapstone is special order.

#### Pattern Guide:

*H = Herringbone  *R = Running Bond

**Please Note:**

- 4” firebrick must be used on the side walls of these units. To achieve this for the Magnum 60 & 72 models, you will need 60 additional full or split firebricks. To achieve this for the Magnum+ models, you will need 70 additional full or split firebricks.

Isoset FireBrick Mortar

Isoset Brick Mortar, a thin-set masonry adhesive, can be used in either interiors or exteriors for laying of firebrick. It is the specified firebrick mortar to be used in all Isokern Fireplaces. Isoset is available in 50lb buckets, approximately 50 lbs of prepared mortar will lay firebrick for fireplaces up to 48”.

Isoset FireBrick Mortar
Take your fireplace’s flames to new heights with Isokern’s Isoflame Log Sets.

Our Vented and Vent-free Isoflame Gas Log Sets have lively flames and large ember beds to highlight our remarkable craftsmanship. With efficient heat and unmatched beauty, each log set comes with a flame height remote control and electric ignition.

About Premium Gas Logs

Whether you just need to replace your existing worn out logs or you need to convert your wood burning fire box into a gas fireplace, our Premium Gas Logs are the perfect place to start. Their life like quality dramatically increase the aesthetic appearance of your fireplace and even the burners create an ambiance of tranquility while in use. All of our products are easy to install for any licensed contractor.
Take the wonderful ambience of fire anywhere in your home with Isokern’s Fire-Lite Application.

Using the Metal Stand in the Fire-Lite Application, both the Isokern Magnum and Standard Series can be placed directly on a combustible floor or be recessed into any combustible floor system including hearth extension as an approved, listed application with detailed plans available.

Enjoy the warmth of a wood burning fire while contributing to a cleaner environment.

The GreenTech Solution by earthcore can be easily installed in a matter of minutes and reduce particulate emissions by up to 80%. While your fireplace is in use, the direct flame cleans the Green Tech Catalytic Combuster, resulting in a maintenance free solution for cleaner air in and outside of your home. The Earthcore Exclusive Catalytic Combustor can be added to any Isokern Magnum or Standard Series fireplace.
Give your venting custom style without the weight with Isokern’s Elemetal Chimney Pots.

Our Decorative Steel Pots have all the appeal of our popular traditional clay pots, at a fraction of the weight and cost. Earthcore’s decorative steel pots are fashioned from 24” gauge, colored, Kynar steel. They are available in five standard colors and come with a 20-year warranty.

The Lightweight Venting Solution that uses a locking-tab design, ensuring immediate and tight assembly.

With a 12 5/8” inner diameter and a 15 5/8” outer diameter, it is rated for any solid fuel Isokern Fireplace. This versatile system has been tested and approved for use with Isokern Standard and Magnum fireplaces in typical OR Fire-Lite applications. Available in air-cooled (EcoSteel) or insulated (EcoSteel+).
Outdoor Solutions
Earthcore has streamlined the construction of building the classic culinary outdoor kitchen for quick assembly.

Using our Isokern Panels and Clips, building a beautiful, durable and practical outdoor kitchen is easier than ever. The Isopanels will also support the Iso’ven for added options to construction.

Isokern Panels Components

Each panel weighs only 100 lbs, so they’re easily moved when assembling your new outdoor kitchen components.

Optional Storage Base

The ideal companion for your Iso’ven Wood Burning Pizza Oven — our Optional Storage Base. It allows you to choose the height of your Iso’ven in relation to the rest of your outdoor kitchen or living space. Installed as-is, with no customization, our Iso’ven base is the perfect height to pair with one of our Isokern outdoor fireplaces.

Includes:
1. Utility Tong
2. (2) 12” Pizza Screens
3. 26” Pizza Peel
4. Stainless Steel Mixing Paddle

ACCESSORY KIT

Experience the simple joys of fire in the easiest way imaginable. Enhance your cooking pleasure with the Iso’ven Accessory Kit, which includes a wide array of tools specifically for cooking with your Iso’ven Wood Burning Pizza Oven.

Includes:
1. Utility Tong
2. (2) 12” Pizza Screens
3. 26” Pizza Peel
4. Stainless Steel Mixing Paddle

The user-friendly, remarkably affordable outdoor wood burning pizza oven made from our exclusive volcanic material.

Created for easy installation, the Iso’ven Wood Burning Pizza Oven comes with everything you need to get started, including an accessory package of helpful cooking tools.

Optional Hood

Following the classic approach of traditional wood burning ovens, the Iso’ven is designed to vent through the front. But at Earthcore, we believe customization creates satisfaction. So, if you prefer a flue, we now offer a Hood for Iso’ven designs, giving you the freedom to finish it in your own personal style.
