Since its founding in 1891, Acme Brick has continually advanced the art and science of providing affordable, sustainable, enduring, and beautiful product choices for America’s homeowners, builders, contractors, institutions, and businesses.

Acme Brick Tile & Stone traces its roots back to 1964 and is a leader in providing builders, architects, designers, and contractors with a wide range of excellent products. At more than 50 locations across 13 states, Acme Brick Tile & Stone, offers distinctive products of superior quality, sourced from around the world and delivered with impeccable service – and at many locations, in-house design assistance. Our customers include builders, architects, designers, contractors, and DIY homeowners.

In ways large and small, Acme Brick associates work hard to provide building materials that are as good for the environment as it is for the people who build with it.
The simplicity of stone-effect surfaces and the sense of authenticity of those who live in a space are very closely linked - interior designers thoroughly understand this relationship. Kone creates new design scenarios in which interior and exterior urban architectures are in tune with living materials.
The Kone surface, inspired by the simple aesthetic of limestone, translates into spectacular projects where the living experience takes on a primordial appeal. An elegant material comes to life in minimalist neutral tones, with barely perceptible veins and inclusions.
The porcelain tile project interprets the material in an innovative way. The look of limestone is embodied in two contrasting and complementary identities: one is natural and simple, the other glossy and more spectacular.
Natural stone inspires the Keno range. Each shade suggests authenticity and elegance. A white, a warm-colored beige, and a modern grayscale range.

outdoor connections

Architecture inspired by nature helps push the envelope both indoors and out. In the design of outdoor spaces, functionality and beauty become allies of the original stone.
Wall tiles that offer continuity with the floors furnish spaces with uniformity, for rigorous architectures reflecting a free and fresh design. 3D reliefs create a sculpted stone effect.
Neutral backgrounds - either smooth or dynamic with three-dimensional reliefs - spread across walls reflecting the mood of natural stone.
comfortable

ELEGANCE

DOWNTOWN, EVENING

Authentic architecture provides an experience of wellbeing. Neutral backgrounds inspired by limestone and three-dimensional decorations open the way for instinctive and natural designs.

The glossy polished finish is suitable for residential or low-traffic commercial floors, where no anti-slip performance is required, and for walls. The polished glossy surface looks surprisingly brilliant and bright, features slight irregularities. The extraordinary brilliance and the easy cleaning of the surface are the result of in-depth research aimed at guaranteeing its durability over time. If the product is in direct contact with the outdoors, provide devices for absorbing moisture and dirt to prevent scratches.
