ABOUT US

M Stone - Texas, has been founded after gaining years of experience, technical skill and know-how about the development of natural stone products.

The company owns some of the largest mines and quarries in India and is well recognised for its high quality product range. Besides the organization also enjoys exclusive patronage of some of the best mining, production and finishing facilities in India, China and Europe. The core strength of M Stone lies in the large network of suppliers spread all across the world and our dedicated staff.

From sourcing exclusive project oriented products to the development of innovative ideas and applications, we can source, create and innovate any natural stone product to your needs and specifications.

M Stone offers: Entire range of Slate, Sandstone, Limestone, Quartzite, Marble, Granite, Handicrafts along with a very exclusive range of: Ledgestone Panels and Mosaic.

Most of our products are CE certified for applications in Europe and all our products are sourced from companies engaged in Ethical Trade Practices.

M Stone assures that it sources material from companies knows for environment friendly practices and no child labour is involved in production of its products.

The entire range indigenous and imported marbles are on display in our showroom. Our team of skilled craftsmen and technicians is always ready to assist you with selection of the right product, befitting your needs and the project.

1. Corner panels are used to finish outside corners with natural edges. Inside corners should be mitered from plain panels.

2. Corner panels have natural rock faced ends on both sides and are shaped as shown. They are 24” long and 6” high with approximately one square foot coverage.

3. Corner panels should be cut into two pieces at desired length and finger joined around the outside corner as shown. One corner panel is needed to complete one linear foot of outside corner.

4. Continue installation by removing one staggered end of the plan in ledger stone piece and place adjacent to the installed corner piece to continue same row.

5. Alternate the size of the corner pieces to help stagger the joints. Do not stagger in a brick fashion, but randomly alter the size to conceal the joint patterns.

SUBSTRATE REQUIREMENTS
For best bonding results, the surface should be clean, dry, and have open pores for adhesion. Smooth, non-porous or polished surfaces should be avoided to adhere to. Interior installations of ledgestones could be installed on gypsum drywall or exterior grade plywood for up to 10’ in height. Cement board is recommended for interior walls exceeding 10’ in height. For exterior applications, LEDGESTONE can be installed directly onto brick, masonry block, cured concrete, or cement board.

MORTAR RECOMMENDATION
For all installations, a polymer modified mortar is recommended. For commercial installations, as well as exterior installations over 10’ in height, a polymer modified mortar with a latex additive is strongly recommended.

CORNER PANEL INSTALLATION
Please follow below steps to achieve a natural hand stacked appearance:

LEDGESTONE - CORNER PANEL INSTALLATION
We at M Stone engage in ethical trade practices and the welfare of the workforce working in our mining, quarrying and production facilities is our prime objective. While the safety and security measures are well entrenched in our work practices, we also take initiative to assure good living and medical facilities for our employees.

Our Social responsibility is not an obligation to us. It is inborn in us and we work to take care of our community in different ways. Our primary concern is to contribute positively to the underprivileged communities by supporting a wide range of socio-economic, educational and health initiatives.

M Stone through its patrons in India is engaged in sponsoring the education of poor children and has taken responsibility for the smooth operation of a high school in India.
