YANKEE HILL

BRICK & TILE

Commercial

Yankee Hill Brick and Tile offers a wide array of rich, vibrant colors, and textures. With our unsurpassed blending capabilities we also offer you the design flexibility to use any combination of our standard colors and textures in any of our available sizes. When architects think Yankee Hill Brick, they think color. Comments like, "We knew exactly what color we wanted. And that's exactly what we got" are typical. You can choose as few as 10% of one type brick blended seamlessly with as many as four others. This gives architects a choice of colors far beyond the ordinary. We also understand the need for shapes that extend the design range of masonry and have the expertise to satisfy your needs in that arena as well.
