

CAPE GIRARDEAU CATALOG | Vol. III
PAVERS | WALLS | OUTDOOR LIVING

CityStone™ Demi / Granite Blend and Harington® Medley / Chicago Blend

Imagine the possibilities...

Every day, Keystone Hardscapes helps turn possibilities into realities: an intimate backyard gathering space to entertain family and friends... a plaza with a unique, stylish ambiance... a stunning driveway and walkways to make that great first impression...

Keystone Hardscapes is where beauty, versatility and function meet. Since the 1980s, our products have been installed in thousands of residential and commercial properties. Our innovative pavers, walls and outdoor living elements continue to be favorites of homeowners, contractors, designers and developers.

Locally made products, nationally trusted brand. Trust us to help bring your next project to life.

PALLET OVERVIEW by Paver

PALLET OVERVIEW by Paver

Color Variations

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

The Nature of Efflorescence

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

ACCESSORIES

SB-7700 SEMI-GLOSS JOINT STABILIZING SEALER WITH ANTIFUNGAL FILM PROTECTION – Joint Stabilizing Sealer is a water-based, single component, self-crosslinking acrylic co-polymer sealer and joint sand stabilizer with outstanding durability. SB-7700 is specially formulated with an antifungal designed to help inhibit the growth of mold, moss and algae on the sealer film when applied to horizontal or vertical surfaces.

SB-8700 WET LOOK JOINT STABILIZING SEALER WITH ANTIFUNGAL FILM PROTECTION – Wet Look Joint Stabilizing Sealer is an advanced premium acrylic sealer that is ‘rain safe’ 90 minutes after application and will not yellow under exposure to sunlight. It is a 3 in 1 product, it enhances surface tone with semi-gloss finish, protects the substrate surface and stabilizes joint sand. SB-8700 is specially formulated with an antifungal designed to inhibit the growth of mold, moss and algae on the sealer film when applied to horizontal or vertical surfaces.

EFFLO OFF EFFLORESCENCE, MINERAL & SALT DEPOSIT CLEANER – Efflo Off is a buffered, non-acid, organic salts, technologically advanced concentrated cleaner designed for the removal of efflorescence, mineral and salt deposits from virtually any type of hardscape surface with minimal or no brushing. Efflo Off’s unique Clean Rinse Technology allows residue to be quickly and easily rinsed away with a high or low pressure washer.

SUPERIOR STRENGTH SOLVENT-BASED ADHESIVE – SRW Adhesive is the strongest adhesive of its kind. It is formulated for retaining walls, pavers, block, masonry, concrete, aluminum, steel and most common landscaping materials. Superior strength and longevity, works on wet or frozen surfaces, extrudes down to 10°F, will not freeze, permanent bond and for interior/exterior use.

POLYMERIC SAND – Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

SNAP EDGE PAVER RESTRAINT – Edge restraints secure the hardscape system and are a necessity in any hardscape project installation if you want it to look beautiful through the years. To avoid the high cost of paver edge restraint failure and ultimately protect your reputation, carefully consider the many factors that affect the edge restraint’s performance over the lifetime of a paver project.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
