TRULINE®

TRUCEDAR® STEEL SIDING

TruCedar Steel Siding utilizes one of the strongest, most versatile and recyclable materials on our planet, reducing your carbon footprint and safeguarding against costly repairs. From pencil sketch to finished profile, our entire siding collection was expertly engineered to blend the best of both durability and aesthetic. TruCedar Siding's steel core provides unmatched impact resistance that doesn't crack, melt or wick water like other siding materials and perfectly mimics the look of real wood siding in a range of curated color options.

PORCH CEILING

Porch ceilings and home overhangs were traditionally enclosed in painted wood, leading to lots of maintenance that's not required with the Porch Ceiling collection. The authentic woodgrain look that gives the appearance of real wood with the performance and durability of aluminum offers an upscale design as a home's first impression.

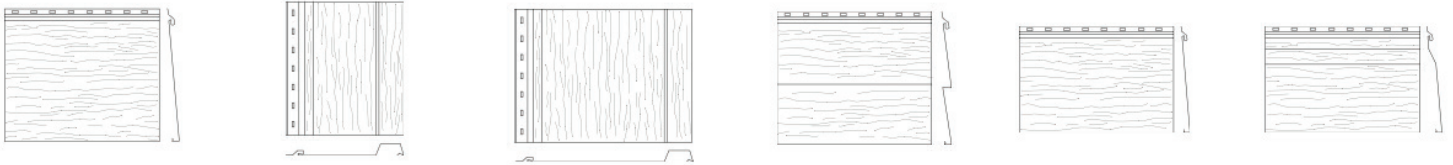

TRUVENT® HIDDEN VENT SOFFIT

TruVent Hidden Vent Soffit, with its patented design gives you a premium style with both solid and woodgrain options without sacrificing performance. TruVent changed the industry when it came to hidden vent soffit, creating the crisp, clean design of the angled vent system and did it again with the woodgrain soffit that complements any home design.

TRULINE® PERFORMANCE DRIVEN SOFFIT

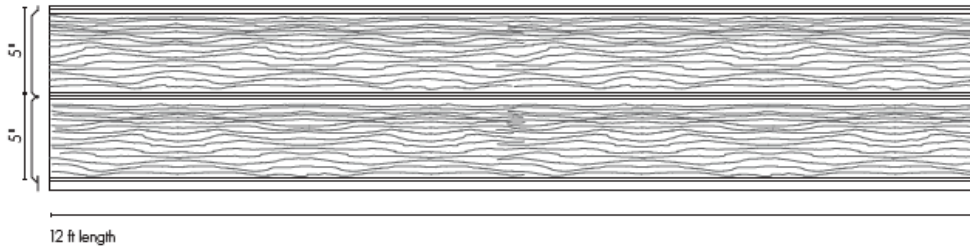

Engineered for ultimate ventilation, TruLine is a performance driven soffit designed to maximize the amount of airflow with a wide range of ventilation options. Developed using our exclusive boundary-pushing performance process, TruLine is one of the most effective soffits available on the market.
